

# BSP Wi-Fi Module Setup Instructions for Android Devices

- 1 Open the "Play Store" in your Android Device:**

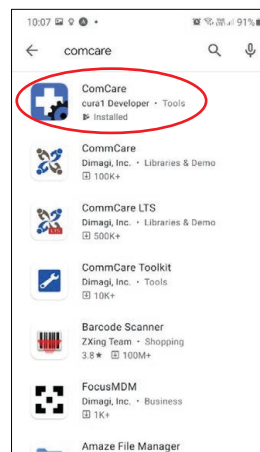

- 2 Search for "ComCare"**

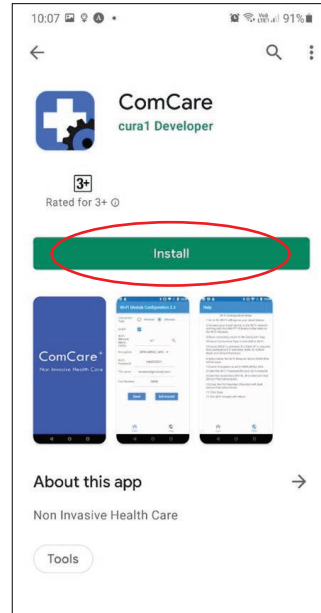

In your Play Store, click in the **Search for apps** input box, then type **"ComCare"** and perform the search by clicking the "search" button or magnifying glass icon.

- 3 Find "ComCare" amongst the Search Results and Click on it**

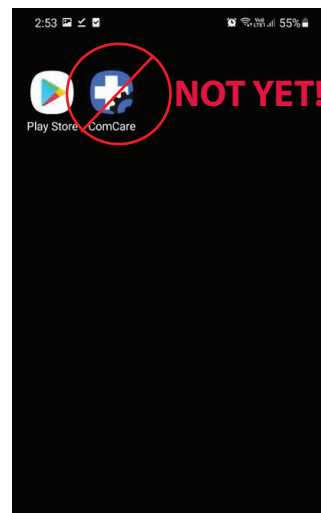

**4 Click 'Install' button to install ComCare**

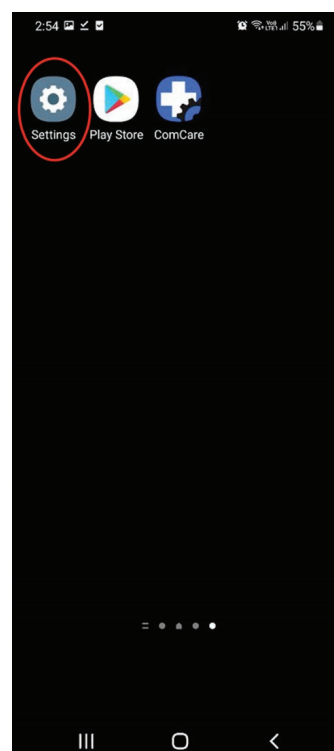

**5 When you have successfully installed the ComCare app, it will appear in your device.**

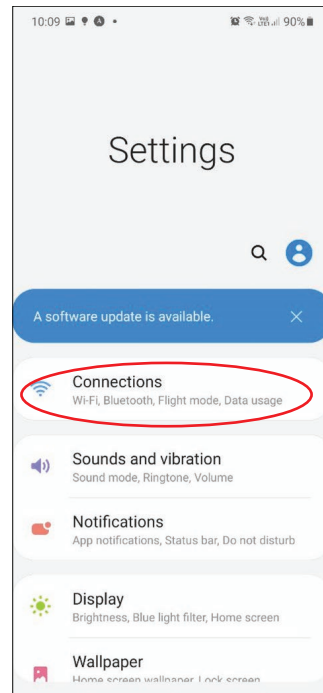

**Please do NOT open the App at this stage.**

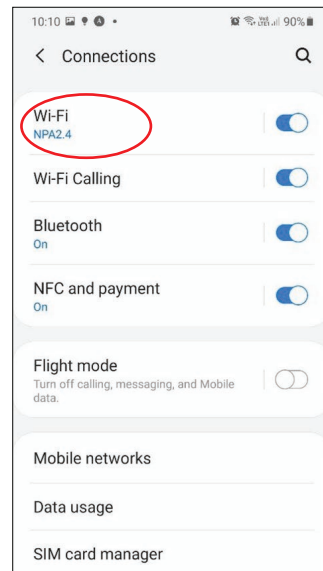

**6 Open "Settings" in your Android device.**

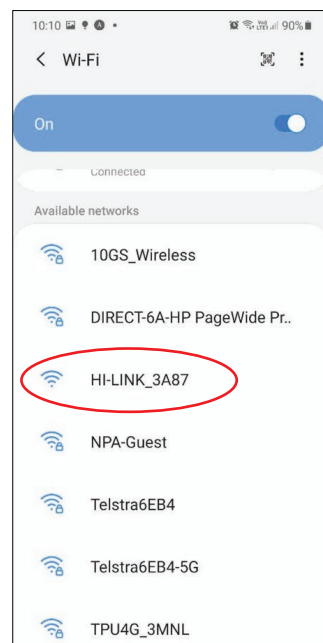

**7 Click the "Connections" button**

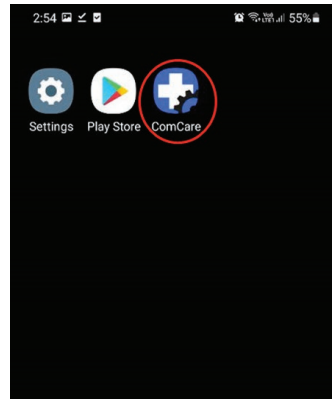

**8 Click the "Wi-Fi" button**

**9 Select and Connect to HI-LINK\_XXXX (Your Wi-Fi Module ID).**

- 10** After your device is connected to HI-LINK\_XXXX go back to your home screen and click the ComCare icon to open the ComCare App.

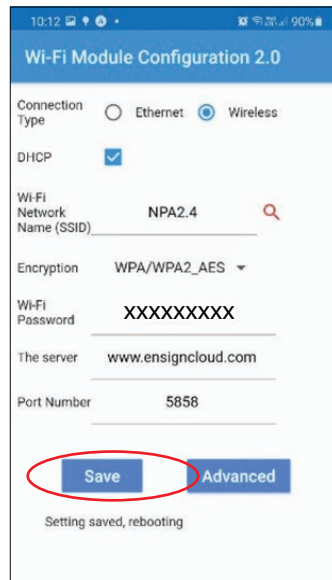

**11** Configure the BSP's Wi-Fi Module Network Settings

Once the ComCare App is open

- Ensure **Connection Type** is selected as **Wireless**
- Change the **Wi-Fi Network Name(SSID)** to your **Wi-Fi network SSID**
- Change **Wi-Fi Password** to your **Wi-Fi password**
- Change **Destination IP** to **www.ensigncloud.com**
- Ensure **Encryption** is **WPA/WPA2-AES**
- Ensure **Port Number** is **5858**
- Then click **Save**

**12** Once the connection process is complete, it will show 'Setting saved, rebooting'.

**11** Check That Your BSP/s Are Visible at [www.ensigncloud.com](http://www.ensigncloud.com)

Your BSP/s should now be visible awith your usual web browser at [www.ensigncloud.com](http://www.ensigncloud.com) after you have logged in.
